

OCTOBER IS

BREAST CANCER AWARENESS MONTH

DID YOU KNOW

An estimated **215,990** new cases of breast cancer in women are expected to occur during 2004.....It has been estimated that **40,110** women will die from breast cancer this year

There are slightly more than **2 million** women living in the United States who have been diagnosed with and treated for breast cancer

The breast is the leading cancer site among American women and is the leading cause of cancer deaths among women ages 40-59

The 5 year survival rate for all women diagnosed with breast cancer is 87% which means most will live a full life without a recurrence

Our cancer benefits can help offset the financial burden put on you and your loved ones as a result of this tragic disease
