

Your Paycheck Could Be Stolen By Disability

How long could you make it without your paycheck?

Do you find it **hard** living within your income?

How would it be **living** without YOUR income?

If you became hurt or sick, how would you provide for you and your family?

Most People are concerned about insuring their cars, their homes, and their health!

Very few people consider insuring what pays for those other things. **Your Income!** Every person is a money-making machine and should be insured for their loss of income.

If disability took away your ability to work, your income could stop but the bill's won't! The disability income is "Income Tax Free".

Disability income protection pays you money when you can't work because of sickness or injury. You can use this money to pay for business and personal expenses. Disability income protection can mean the difference between foreclosure (1/2 of all foreclosures are due to disability) and keeping your home and car. Disability income protection can keep your business going until you get back on your feet.
