

# THE whole fruit.. & NOTHING BUT THE TRUTH!

“...these results will once and for all verify the truth about our use of whole fruit mangosteen”

Recently, I read yet another press release from XanGo® which professed their dominance in the mangosteen juice category and touted the other beneficial phytonutrients found in their whole fruit mangosteen juice product. Only when they suggested that other products utilizing “powdered extracts” cannot boast beneficial levels of xanthones and phytonutrients did I feel obligated to make sure the truth is told about Vemma®. The best and most credible way I have found to accomplish this is through independent testing for the very nutrients XanGo states are in their whole fruit mangosteen juice product.

Hopefully, these independent test results will once and for all verify the truth about our use of whole fruit mangosteen. Vemma not only uses whole fruit mangosteen with mangosteen pericarp extract, but also organic, glyconutrient-rich aloe vera, decaffeinated organic green tea and a full spectrum of antioxidant vitamins, along with our famous plant-source essential minerals.

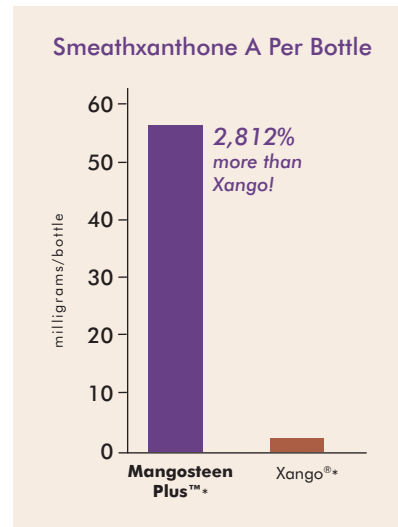

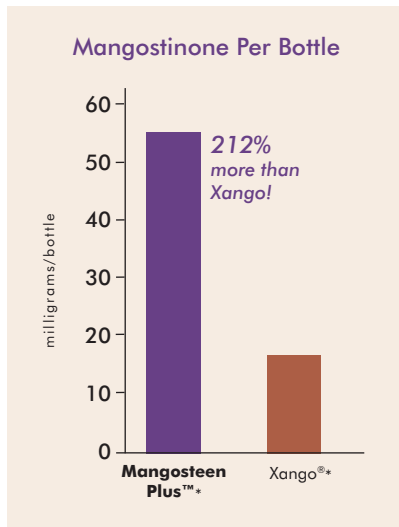

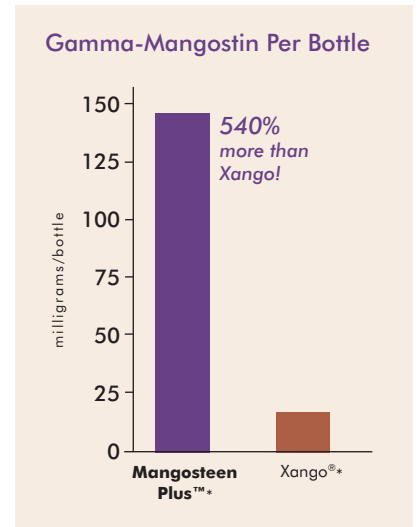

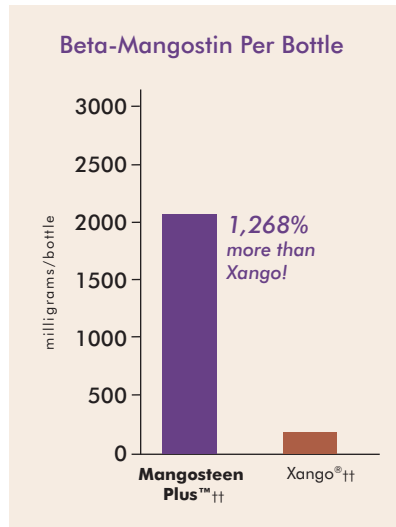

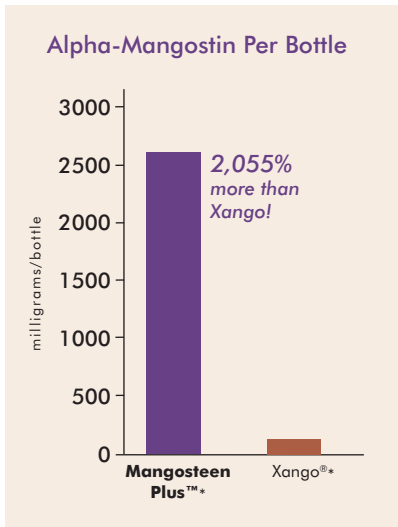

I was once told that documentation beats conversation every time. Below is the most recent third-party laboratory documentation supporting our guarantee that Vemma uses only the highest-potency, finest-quality wildcrafted whole fruit mangosteen available in the world. We proudly market the most complete, best-tasting mangosteen-aloe based nutritional product available anywhere!

Here's to your health,

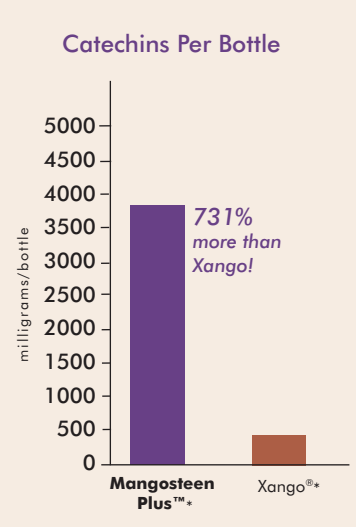

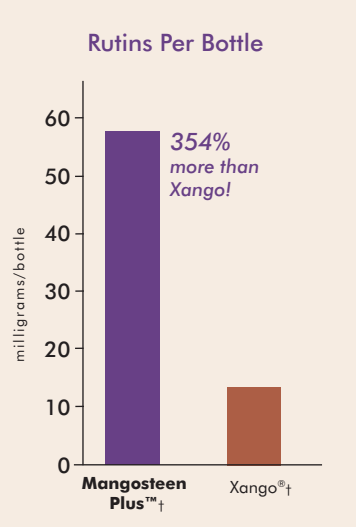

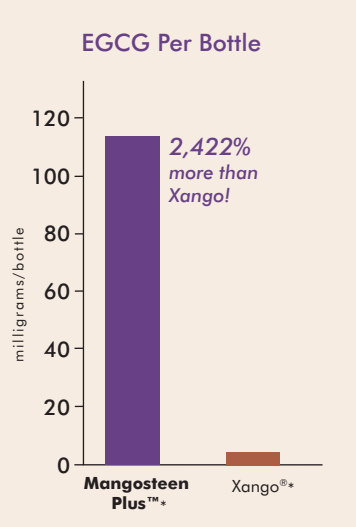

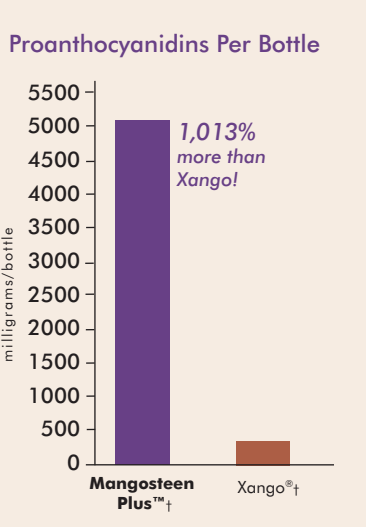

BK Boreyko  
President, CEO
